Minibeast Detectives!

Everyone loves finding minibeasts and they're not difficult to find! So let's become minibeast detectives today!

Think about where minibeasts like to live... cool, dark, damp places !

So where would be a good place to look?

- **Under bricks and stones**
- **Under logs**
- **In the cracks of bark on trees**
- **At the bottom of long grass**
- **In little mounds of earth**
- **Don't forget to look up too to spot butterflies, bees, hoverflies!**

If you want to look at your minibeasts more closely put them in a plastic food box. Pick them up very carefully or use something like a soft paintbrush. Remember to put them back after you've looked.

inSpire

Super challenge for older kids: 😊

Can you find a minibeast for every letter of the alphabet? !!

Or, be artistic.....

- if you like drawing, why not sketch all the minibeasts you find
- or take photos of them and make a photo collage

Have a great hunt!
