Lovely photo frames

How about making some great photo frames today and send them to friends or family to bring a smile to their faces during lockdown?

You can use anything to make a good border for your photo: wool; ribbons; shells, pasta (if you have enough to spare); twigs; dried flowers or leaves; twigs; cut up pieces of coloured paper/magazines/material; broken egg shells; buttons; cut up silver foil

If you have card, take a sheet and fold it in half. Put your photo in the centre of one half and cut a border that will be frame your photo well.

It's best to do all the sticking of the border before you slip your photo in the middle of the two pieces of card.

Why not cut your photo into an interesting shape around the edge?

If you have used egg shells or pasta you can paint them in your favourite colour or your friend's favourite colour or just to look bright and cheerful!
