Get creative! Make a bug!

Last Monday we made Bug Hotels 😊 . Have any bugs moved in yet?!

Today, let's make a bug. You can invent your own monster insect if you want!

You could:

- Paint it
- Draw it with chalks on the paving stones
- Make a giant insect in the garden using anything (old towels, newspaper, containers, garden sticks, balls, skipping ropes.....anything at all!) You can either make it collage style, flat on the lawn (like Art Attack) or you could try and make it 3D! Don't forget to help clear up later!
- Model it with plasticine and other small items.
- Create a collage with rolled up tissue paper, coloured paper or different lentils, rice (if you have some to spare).
- Or you could print with a cut potato and make a scene with lots of bugs!
