Garden ball games

**Number ball** is a great game for any number of players and any age. All the players are numbered and stand around in the designated area. You can stand in a circle if you want to. Player 1 throws the ball in the air and calls a number. That child has to catch the ball either before it bounces or on the bounce (you can decide on the rule). If the second player catches the ball, he then throws the ball up and calls another number; if he missed the ball the first player throws again.

**Rounders** always a good one as you can play with anything as a base. (sweatshirts are always good!). All you need then is a ball and a bat. Any bat will do.....tennis, cricket, wooden beach ball bat or if you haven't got one, a frying pan is always fun!

### **Bowling**

Create your own bowling alley. Use empty drinks bottles as the pins. Weight them by semi filling them with soil or sand. Stick numbers on the bottles to score points when they are knocked over. Bowl normally or play football bowling.
