Tin can alley

You can make this a real craft project by decorating your tins to make a game to keep from year to year. You can also make it as easy or as hard as you like by using empty tins or full tins or lighter or heavier balls.

Aim and throw!

Take 10 tins and label them 1-10. (If you want to make a game that lasts then you can paint the cans with bright colours and paint big numbers on them.)

Place them on a garden table and decide on how many throws of the ball or bean bag each person can have. (younger children could have more turns). See who can knock the most tins over and score the most points by counting up the numbers on the tins.
